

# COVID-19 Community Report

Date: Wednesday, December 9, 2020

Time: 6:45 PM

# 20-079

## CDC Guidance for COVID-19

[On December 2, the CDC updated its quarantine recommendations.](#)

Per the new guidance, the CDC continues to suggest a 14 day quarantine period, but allows local health authorities to shorten quarantine based on the following conditions:

- Quarantine can end after Day 10 without testing and if no symptoms have been reported during daily monitoring
- Quarantine can end after Day 7 if a tests negative and if no symptoms were reported during daily monitoring

In both cases, additional criteria (e.g., continued symptom monitoring and masking through Day 14) must be met

## COVID-19 Vaccine Key Points

- In Florida, the State and the Governor will make the final decision on vaccine priorities and how they will be implemented
- Initially there will be limited vaccine availability, resulting in the need for a phased approach by priority groups
- Current vaccine requires two shots, so 10 million doses is actually 5 million people
- It will take some time before it is widely available for mass dispensing
- The CDC has issued information on the [Benefits of Getting a COVID-19 Vaccine](#)
